

ADA COMPLIANCE AND TRANSITION PLAN

REVISED JANUARY 2015

**City of Mill Creek
15728 Main Street
Mill Creek, WA 98012
(425) 745-1891**

INTRODUCTION

The American Disabilities Act (ADA) of 1990 requires all public agencies with more than 50 employees to create and implement a *Transition Plan*. The purpose of this document is to ensure that the City of Mill Creek is compliant with all applicable ADA requirements, and create steps to make all public pedestrian facilities accessible to persons with disabilities wherever feasible.

Additional detailed information regarding the ADA requirements is available from numerous sources in the FHWA, WSDOT, Federal Access Board and Federal Department of Justice.

The City of Mill Creek *Transition Plan* consists of the following required elements:

- 1) Designation of an ADA compliance manager
- 2) Public notice about ADA requirements and processes
- 3) Grievance procedure
- 4) Implementation standards and policies
- 5) Self-Evaluation survey to create an inventory of known ADA issues or obstacles
- 6) Schedule and methods for upgrading public facilities
- 7) Monitoring and updating the *Transition Plan*

COMPLIANCE MANAGER

The designated ADA compliance manager for the City of Mill Creek is the City Manager.

Assistance with specific issues may also involve the City Engineer, Public Works / Maintenance staff, Building Official, City Clerk, City Attorney and Human Resources.

PUBLIC NOTICE

No less than annually, the City will publish a notification of the ADA Transition Plan in the newspaper of record and local publications, such as the Mill Creek Living Magazine, and also post an official Notice form in all City owned public buildings. A record will be kept by the City Clerk of all publication and notice events.

The draft *Transition Plan* will be made available on the City website, from the City Engineer's office and at the front counter of City Hall. Alternate means and accommodations for viewing the plan will be made available upon request for persons with disabilities.

Notifications may also include requests for public input or assistance in identifying ADA barriers around the City. Examples include Capital improvement project requests, displaced sidewalk panels, missing or non-compliant curb ramps, public parks or building facility issues, APS upgrades to traffic signals, etc.

GRIEVANCE PROCEDURE – *Adopted from the Federal Department of Justice.*

The following process is for formal complaints. Informal questions, facility or project requests, status updates, etc, may be directed to an appropriate staff member for a response.

This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990. It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the City. The City's Personnel Policy governs employment-related complaints of disability discrimination.

The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of complainant and location, date, and description of the problem. Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint, will be made available for persons with disabilities upon request.

The complaint should be submitted by the grievant and/or his/her designee as soon as possible but no later than 60 calendar days after the alleged violation to:

***City Manager
City of Mill Creek
15728 Main Street
Mill Creek, WA 98012
425-745-1891***

Within 15 calendar days after receipt of the complaint, the City Manager or their designee will meet with the complainant to discuss the complaint and the possible resolutions. Within 15 calendar days of the meeting, the City Manager or their designee will respond in writing, and where appropriate, in format accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of the City and offer options for substantive resolution of the complaint.

If the response by the City Manager or their designee does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to the City Council.

Within 15 calendar days after receipt of the appeal, a representative of the City Council or a designee will meet with the complainant to discuss the complaint and possible resolutions. Within 15 calendar days after the meeting, the City Council representative or their designee will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received by the City Manager or their designee, appeals to the City Council, and responses from these two offices will be retained by the City for at least three years.

IMPLEMENTATION STANDARDS

Details and Standards

The City has developed details and standards for construction of pedestrian facilities which will be used on all private land development and City Capital projects. These details are available in the publication "*City of Mill Creek Design and Construction Standard Plans*", and were last updated in January 2013.

Additional details and standards may be available from other agencies such as WSDOT, Snohomish County, 2011 PROWAG manual or the Federal Access Board. Use of these alternate details and/or standards should be approved by the ADA compliance manager or their designee.

New Construction

All new construction work for both private land development and City Capital projects must incorporate ADA accessible features to the maximum extent that is technically feasible.

Alteration

All alteration work as defined below must upgrade appropriate accessibility features within the scope of the project to current ADA standards to the maximum extent that is technically feasible. All accessibility upgrade work must be completed within the same timeframe as the alteration project. This does not include maintenance work or upgrades outside the project scope.

Alteration is defined as any work that could affect the structure, grade, function or use of a pedestrian route or public use of a facility. Examples include structural roadway resurfacing as defined in the memorandum dated August 2013 from the joint DOJ / DOT Technical Assistance committee, roadway reconstruction or major rehabilitation, significant traffic signal modifications (i.e. wiring, poles), building or park facility improvements, and projects of a similar scale and effect.

Maintenance

Maintenance activities are not considered alternations, and do not have the same upgrade requirements. Maintenance work includes such items as non-structural roadway resurfacing as defined in the memorandum dated August 2013 from the joint DOJ / DOT Technical Assistance committee, pothole patching, striping, signage, repairs to storm drainage systems, or repairs and regular maintenance work on public parks and buildings.

It also should be noted that vegetation maintenance along public right-of-way frontage and sidewalks is the typically the responsibility of the property owner per MCMC 12.06.060.

Feasibility

Upgrades and new facilities should provide accessibility to the maximum extent that is technically feasible (MEF). Feasibility is determined by physical constraints only, such as terrain, available right-of-way, underground structures, adjacent developed facilities, environmental elements, drainage and/or historic / cultural features. Situations where installation or upgrades of ADA accessible facilities are not feasible should be adequately documented.

IMPLEMENTATION POLICIES

Accessible Pedestrian Signals (APS)

New City owned traffic signals and Rectangular Rapid Flashing Beacons (RRFB) shall be designed and constructed to include current APS hardware and facilities.

Existing City owned traffic signals and RRFB shall be upgraded to include current APS hardware when the adjacent curb ramps are required to be upgraded or significant modifications are made to the signal infrastructure (i.e. wiring, poles). Citizen requests for an APS upgrade to existing facilities outside a planned schedule will be considered on an individual basis.

State owned and operated traffic signals, such as those on SR 527 and SR 96, are the jurisdiction and responsibility of WSDOT. Inquiries and requests for APS upgrades on state facilities that are received at the City shall be forwarded to WSDOT as soon as possible.

Accessibility Guidelines for Pedestrian Facilities in the Public Right-of-Way (PROWAG)

The City shall use and implement the guidelines as set forth in the 2011 version of the PROWAG.

Motorized Mobility Devices

MCMC section 12.12.080 addresses the use of "wheeled devices" in City parks and trails. However, this does not include electric wheelchairs or other power-driven mobility devices (OPDMD) per MCMC sections 10.28.010 and 10.16.005, as well as RCW 46.04.320.

In no way shall the prohibition of motorized wheeled devices on public facilities be construed to include wheelchairs or OPDMD for persons with a qualifying disability. Appropriate signage shall be installed where needed to avoid confusion.

Receiving Ramps

See RCW 35.68.075 for requirements of matching receiving ramps. A legal street crossing exists in each direction at all public road intersections unless they are signed to prohibit such crossing, and all crossings must be made accessible to people with disabilities.

If a receiving ramp already exists outside the project limits but does not meet current ADA standards, an upgrade is not required.

If installing a receiving ramp is not feasible due to site / grade constraints or desirable due to safety issues, appropriate "No Pedestrian Crossing" signage must be installed on each side.

Internal Task Assignments

See the following *Reorganization Task List* and internal *Policy for Tree Root Repairs* for City staff work assignments as related to the ADA Transition Plan.

Updated November 5, 2014
MAINTENANCE / ENGINEERING REORGANIZATION
TASK ASSIGNMENT

Maintenance Duties (Public Works)

- Signage / striping maintenance and CIP projects
 - CIP project T-38
- Street / path lighting maintenance and CIP projects
 - CIP projects T-21, 21A
- Temporary pavement repairs (i.e. pothole patching)
- Right-of-Way landscape maintenance
- Sidewalk / trail inspection and maintenance (i.e. Citywide survey / painting / shaving / shimming)
 - Report annual capital project repairs to Engineering per PW Policy 14-27
- Asset inventory
 - Creation of a unified database of all City infrastructure
- GIS / mapping
 - Provide annual updated lighting / power infrastructure maps for utility locates
 - Minor addressing corrections that are specifically mapping / GIS related
- Minor Facility CIP projects and maintenance
 - SLWD remodel for PW shop
 - Annex roof, CIP projects O-1, 43, 44
- Minor Park CIP projects and maintenance
 - CIP projects P-24, 29
- Review private land development civil plans for maintenance aspects, provide comments to DCD
- Fleet maintenance
- Solid Waste contract management

- Ditch and pond landscape maintenance contracts
- Street sweeping
- Facility BMP's for SWPPP compliance
 - Includes Filterra maintenance on 9th Ave and City Hall parking lot

Engineering Duties (Community Development)

- Transportation and Surface Water CIP projects
 - Includes ADA transition plan and Concrete Replacement Program per PW Policy 14-27
- Pavement Preservation Program
 - Includes PPP work to be done by SnoCo maintenance crews (i.e. chip seal / crack seal)
- Major Park and Facility CIP projects
- Lead for review, coordination and inspection of all transportation, traffic and stormwater aspects on private land development projects
- Upkeep of all development / CIP project reference files and records (i.e. vault and as-builts)
- Addressing assignments for new developments and major corrections (with Building division)
- ROW permitting and inspection
- Manage on-call engineering and utility locate contracts
- Traffic signal maintenance and operations with SnoCo and WSDOT
- Arts & Beautification Board staffing

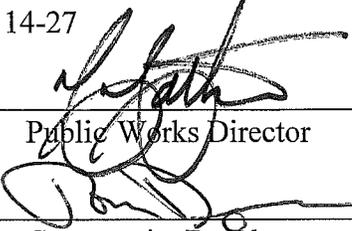

- All surface water billing and administration duties
- NPDES permit compliance and reporting
- Annual stormwater pond and vault inspections
 - Includes WQ vault filter cartridge replacement
- Annual CB cleaning / pipe CCTV inspection

**CITY OF MILL CREEK
DEPARTMENT OF PUBLIC WORKS
ADMINISTRATIVE GUIDELINES**

Reference: 14-27

Effective Date: September 1, 2014

Approved: _____

Public Works Director

Approved: _____

Community Development Director

POLICY FOR ADDRESSING TREE ROOT REPAIR ISSUES

The intent of this written guideline is to establish consistent policies, procedures, roles and responsibilities for determining the proper corrective action for public infrastructure damage (i.e. roads, sidewalk, trails, etc.) caused by tree roots or other landscaping.

The policy of the City shall be as follows when trees and/or landscaping need to be removed and replaced from a public Right-of-Way area that is maintained by another property owner in accordance with any development Conditions of Approval or MCMC 12.06:

- Maintenance practices, such as sidewalk shaving and shimming, shall be implemented as long as possible until a permanent repair project is the only feasible option.
- If the removal is done as part of an engineering repair project, then the City will bear all costs for landscaping removal and replacement.
- If the removal is done by, or at the request of, the property owner for aesthetic reasons or issues other than public infrastructure repair, then the owner is responsible for all costs.

Reporting Procedure:

All infrastructure damage, whether found or reported by citizens, staff or any other mechanism, should be directed as soon as possible to the staff person responsible for the appropriate program. This will be different based on the location or type of damage (i.e. sidewalks versus pavement).

The duties and responsibilities of the Public Works / Maintenance staff shall be as follows:

- On a regular basis within an appropriate timeline, conduct a detailed citywide survey of *all* pedestrian walking areas (i.e. sidewalks and public trails) that are maintained by the City.
- ½" shall be the threshold for identifying and logging vertical displacements.
- Prepare and maintain an ongoing inventory of known pedestrian path upheaval areas.
- Implement appropriate maintenance practices for pedestrian path issues, such as visibility painting, sidewalk shaving and shimming, until no longer feasible.
- On an annual basis, provide list of pedestrian repair sites to Engineering staff for inclusion into an appropriate capital improvement project.

The duties and responsibilities of the Engineering staff shall be as follows:

- Conduct a citywide pavement condition survey when appropriate as part of the ongoing Pavement Preservation Program (PPP).
- Prepare and maintain an ongoing inventory of known pavement repair areas.
- Prioritize pedestrian repair sites based on criteria listed in the City ADA Transition Plan and available funding.
- Pavement repairs should be coordinated as part of the ongoing PPP.
- Consult with Planning staff regarding tree removal or retention when in question.
- Implement recommendations from Planning staff for tree removal or retention.
- Project management of all phases of capital improvement repair projects, including coordination with property owners.
- Preparation of long term, proactive tree replacement projects as part of the biennial CIP and budget update processes.

The duties and responsibilities of the Planning staff shall be as follows:

- Review of repair sites where tree retention is in question due to size, age, species, damage, location, etc.
- Coordinate with outside experts (i.e. arborist) when appropriate.
- Recommend whether a tree warrants removal and replacement with the same or a new species, or efforts should be made to retain with alternate materials / methods.
- Recommend appropriate replacement landscaping.
- Coordinate the review and approval process of all landscaping replacement with the City Design Review Board if required.

SELF EVALUATION

Field Survey Work

In the summer of 2011, the City began performing on-ground field surveys to evaluate potential accessibility barriers and create an inventory of ADA issues that could be addressed with future capital improvement or alteration projects. This field survey work has been performed on an ongoing, intermittent basis when staffing is available. Consultants and/or additional temporary staffing, such as summer interns, will continue to be utilized in the future.

Engineering staff, as well as a hired consultant, have gone into the field with appropriate measuring devices, such as an electronic “smart” level and measuring tape, to physically check the condition of pedestrian facilities such as curb ramps, crosswalks, signals and transit stops. The City also investigates and responds to any related citizen complaints.

In addition, Public Works staff is responsible for inspecting and maintaining all public sidewalks and trails as defined in the previously mentioned *Reorganization Task List*. Any repair or upgrade work outside the capability of in-house maintenance crews is reported to the Engineering division for inclusion with an appropriate Capital Improvement project.

Typical elements on pedestrian routes that are inspected include, but are not limited to:

- Missing facilities or pedestrian route connections
- Cross / running slopes
- Landing area size and slopes
- Ramp / pedestrian route width or obstructions
- Detectable warning surfaces
- Vertical displacements and surface conditions

In winter 2012, the City Building division staff surveyed three City owned buildings with public access for ADA issues, specifically City Hall, the adjacent Annex Building and the Mill Creek Library. Several identified barriers were corrected in May 2013 by the City’s maintenance staff, but other more significant outstanding items must be programmed for upgrades in the biennial capital improvement program.

In early 2015, a hired consultant will be surveying the 11 City owned park facilities listed in the adopted Comprehensive Plan.

Database Inventory

All sites that are inspected are photographed and ADA deficiencies are recorded in an online database hosted by www.iWorq.com. This self evaluation inventory program is incorporated as part of the *Transition Plan* by this reference. The online data can be sorted and prioritized as needed by City staff to make programming decisions for upcoming improvements.

The database inventory is a “living document” and continually updated, and a current listing of ADA barriers can be easily generated by City staff upon request. The existing inventory as of January 2015 is included with this report as Appendix A.

Following is a brief quantity summary of City facilities that have been identified as of the date of this Plan. Specific barriers can be seen in the collected data in the iWorq inventory, such as non-compliant slopes and widths. These figures are estimated and subject to change based on available data.

(Note – will be expanded with more detail when inventory and database are further developed)

- Curb ramps – approximately 1,500 with less than 1% able to meet current ADA standards
 - Approximately 90% do not meet current ADA standards
 - Approximately 10% have been constructed or updated to the MEF
 - Scheduled for additional field survey in early 2015
- Transit stops – approximately 70
 - Scheduled for field survey in early 2015
- Crosswalks – approximately 125
- Public parks – 11
 - Scheduled for field survey in early 2015
- City buildings with public access – 3
- City traffic signals and RRFB's (collectively referred to as "pedestrian signals") – 11

SCHEDULE AND METHODS OF IMPROVEMENTS

Programmatic ADA Upgrade Mechanisms

Mill Creek utilizes a seven-year Capital Improvement Plan (CIP) process to program improvement projects around the City, and is incorporated as part of the *Transition Plan* by this reference. The CIP project categories consist of Transportation, Parks, Facilities and Surface Water. The CIP is updated every two years and precedes the biennial budget process.

Two of the most relevant ongoing Engineering capital programs to address accessibility issues are the Concrete Replacement Program, CIP Project No. T-01, and Pavement Preservation Program (PPP), CIP Project No. T-34.

The purpose of the Concrete Program is to repair or replace damaged sections of curb and/or sidewalk, improve drainage, reduce trip hazards and install or modify high priority ADA curb ramps. As part of the PPP, all ADA ramps along structural resurfacing routes are upgraded to current standards to the maximum extent feasible.

Copies of the current CIP and PPP are available at City Hall and on the City website.

Also relevant are CIP Projects Nos. P-29 and O-1 for citywide park and building facility improvements, respectively, which are the responsibility of the Public Works staff.

In addition to the CIP projects listed above, specific capital projects may also incorporate new or upgraded pedestrian facilities within their scope of work in accordance with the previous *Implementation Standards / Policies* sections. Specific project information may be available on the City's website or upon request from City staff.

Prioritization

As with any public agency, budget and staff resources in Mill Creek can be limiting factors in correcting identified pedestrian barriers. In addition, due to the large inventory of pedestrian facilities, the City must prioritize improvements and upgrades in planning improvement work.

On an annual basis, typically during the fall / winter season, the current inventory of non-compliant facilities will be reviewed, prioritized in accordance with the criteria below, and assessed against available funding for construction planning. Lower and higher priority facilities may be grouped together on a common route for construction efficiency and cost savings.

Following is a list of priority factors, presented in order of highest to lowest.

- 1) Improvements to a route requested or identified by someone with a qualifying disability that causes accessibility problems
- 2) Identified tripping hazards on a pedestrian route
- 3) Upgrades required as part of an alteration project, such as an asphalt overlay
- 4) Missing ramps or connections on existing pedestrian routes
- 5) Transit routes
- 6) Public parks
- 7) City owned buildings with public access
- 8) Logical and efficient groupings to address non-compliant elements (i.e. running slopes, cross slopes, flares, landings, etc), in these prioritized areas:
 - a. School routes
 - b. Commercial / business districts
 - c. Arterial / collector roadways
 - d. Residential streets
- 9) New pedestrian routes

Scheduling and Methodology

Based on these priority factors, a tentative date and method for upgrade work within the current seven-year CIP cycle is included in the iWorq database inventory in Appendix A. Alternately, for work already completed, the date of the new installation or upgrade is included. This information is subject to change as additional data is collected and improvements are programmed as part of the CIP.

The City Public Works staff also contracts out for sidewalk maintenance work on approximately an annual basis. This work primarily consists of “sidewalk shaving” where the displaced edges of sidewalk panels are ground down to create a uniform walking surface. Additional small scale maintenance work or improvement projects may also be performed by City in-house crews.

MONITORING

The *City Transition Plan*, self evaluation inventory and improvement project performance will be monitored and updated by staff as needed to fully comply with Federal ADA requirements. Updates may be triggered by public input, revisions to the CIP, biennial budget, City policies or completed improvement projects.

This *Transition Plan* was originally drafted in June 2012, then updated in April 2013 and January 2015 after the incorporation of the iWorq database inventory system and to reflect current practices.

APPENDIX A

**ADA SURVEY INVENTORY
WITH SEVEN-YEAR CIP UPDGRADE SCHEDULE
AND METHODOLOGY
AS OF 1/05/15**

DRAFT

Mill Creek Public Buildings Accessibility Survey

City Hall, 15728 Main St.

1. Door to building/planning area out of compliance (18" required)

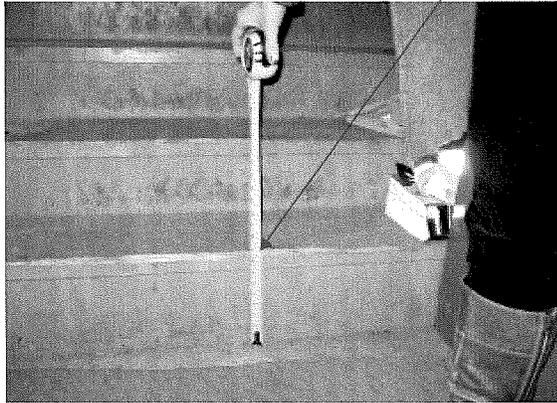

2. Public restrooms sink height (35 ½ inches, should be 34 maximum to top of lavatory.) Also add protection on drains under counters. (Boots or equivalent)

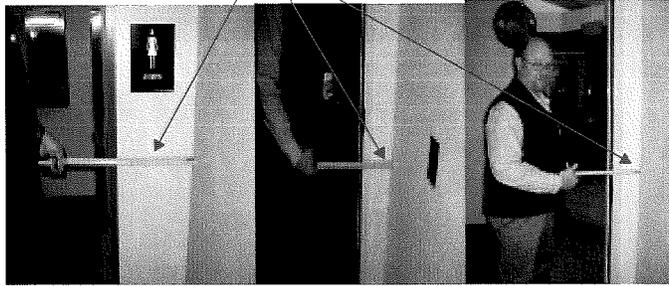

DRAW
PROTECTION
COMPLETED
BY MAY 2013

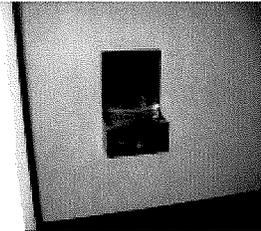

3. Steps in shop. Rise variation (Bottom step 9 inch rise: out of compliance.) The remainder of the treads are 7 inches with a total rise variance of 2 inches. The code allows a 7 inch maximum rise with a 3/8 inch maximum rise variance.

4. Back exit door and multiple police area doors out of compliance. All doors that open in require an 18 inch side clearance.

5. High low drinking fountain required. Only low installed. (Both City Hall and the Huntron Building.)

Huntron Building

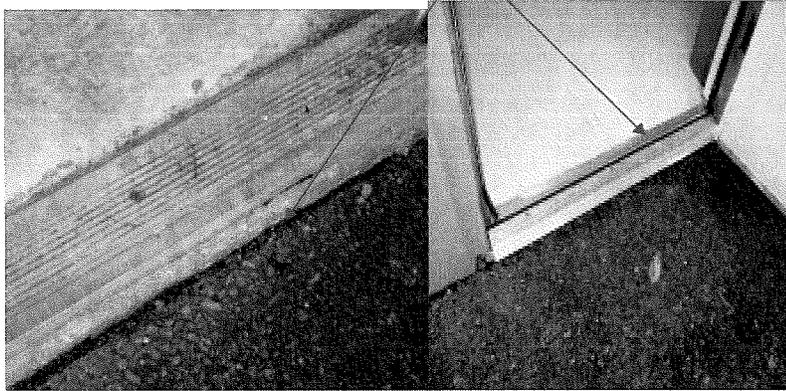

1. All fire extinguishers to be mounted a maximum of 48 inches off the floor. Multiple locations.

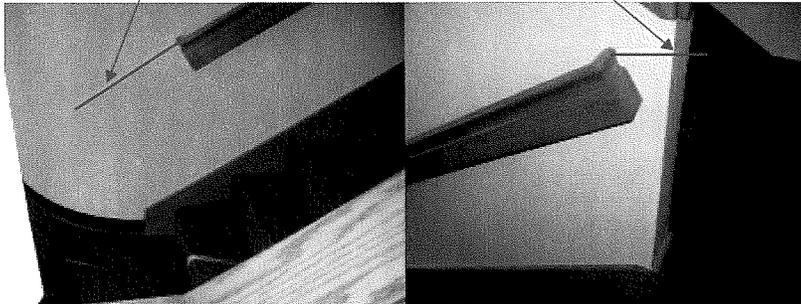

2. Second floor women's restroom: 48 inches from the floor to the top of the sink. 34 inches required.

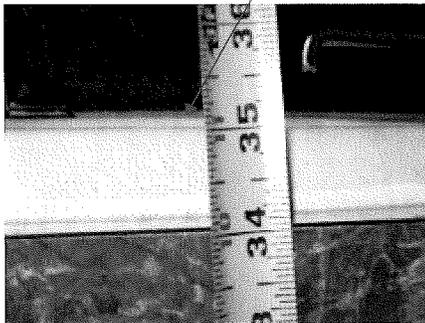

3. Back side exterior doors: Maximum $\frac{1}{2}$ inch space at the thresholds.

4. Handrails for main stairway require extensions at the top and bottom of each flight of stairs. The extension shall be 12 inches at the top of the stair and extend one tread depth beyond the bottom of the stairs.

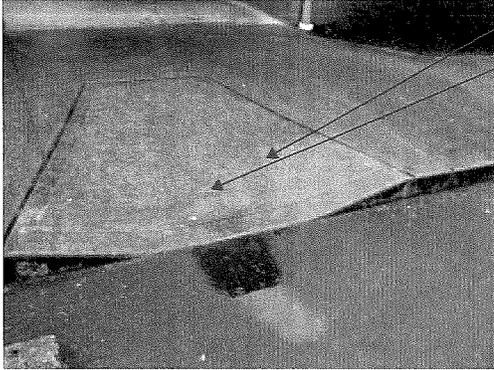

5. Second floor women's restroom lavatory height requires revision from 35 inches to a maximum of 34 inches.

City Library

1. Main entrance sidewalk transition requires side slope of 1/10 and a tactile non slip surface. (Currently truncated domes are required—code change is expected soon for a revised surface requirement.)

2. Kitchen counter employee break area installed at 36 ½ inches which exceeds the 34 inch maximum height requirement.

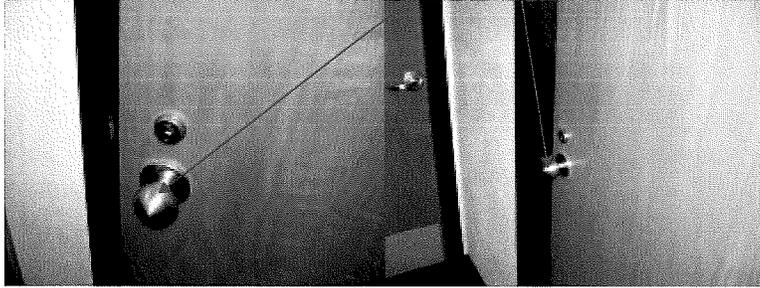

3. Back exit door requires a lever handle as well as the removal of the thumb turn lock.

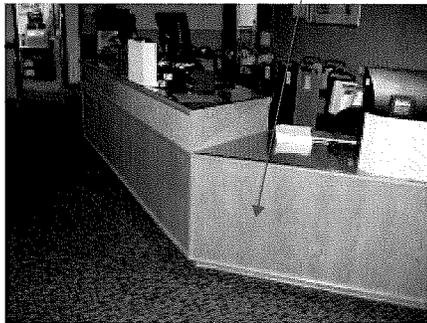

COMPLETED
BY MAY 2013.

4. Janitor and electrical rooms require lever handles. Keyed dead bolt locks OK on these doors.

COMPLETED
BY MAY 2013

5. The service counter with a parallel approach and positioned less than 36 inches off the floor requires a maximum height of 36 inches for the entire counter. If a forward approach is designed, the maximum height shall be 36 inches with a clear floor space below of 27 inches. (We understand that this entire counter is slated for replacement.)

6. Ramp from playground at library to the library parking lot—ramp requires handrails on both sides since it is steeper than 1/20. Additionally, the ramp is steeper than 1/12 and will require modification to a 1/12 maximum slope if part of the accessible route of travel from the playground adjacent to the library.

Location ID	Type	Major Street	Cross Street	Repair or Install Date	Repair Method	Pedestrian Signal Issue
